Lumiere — MVP prototype

Dark-only visual system · Windows + macOS · sRGB Visual Match

01 · FOUNDATIONS

surfaceWindow · #1F1D1B
surfaceRaised · #292624
surfaceHover · #322E2B
surfaceInset · #131211
surfaceMenu · #2B2825
borderSubtle · #302C29
borderDefault · #3C3733
borderStrong · #514A44

textPrimary · #F0EDE6
textSecondary · #B3ACA3
textTertiary · #9A9289
textDisabled · #5A544D
textOnAccent · #241F1C

accentBase · #E8665A
accentHover · #EE776C
accentPress · #D2564B
accentTint · #3A2422
accentBorder · #6E3A34
statusReady · #7FB185
statusCaution · #D9A05B

TYPE — INTER

15 SemiBold · window title
13 SemiBold · action label
13 Regular · body
12 Medium · meta and shortcut
11 Regular · caption
Georgia 20 · wordmark only

GEOMETRY

radius 6 chip · 8 control · 10 card · 12 window
spacing base 4 — 4 / 8 / 12 / 16 / 20 / 24 / 32
main window 440 wide, compact and fixed

ACCENT RULE

Coral is the brand mark colour promoted to the one functional accent. It is allowed on exactly four things: primary action, region selection, focus ring, blocking status. Never decorative, never a gradient, never a glow.

MEASURED CONTRAST

accentBase on surfaceRaised — 4.6:1 (icon, border, dot)
textPrimary on surfaceWindow — 14.2:1
textSecondary on surfaceWindow — 7.6:1
textTertiary on surfaceRaised — 4.8:1
statusReady on surfaceWindow — 6.7:1
statusCaution on surfaceWindow — 7.2:1

Accent is never a large fill. It appears only as icon, 1px border, selection edge, focus ring and status dot.

02 · COMPONENTS

Lumiere

Capturing region
Capture region ⌘⇧4
Capture display ⌘⇧5

Output
Clipboard and folder
~/Pictures/Lumiere

HDR-aware capture ready

Screen recording permission is required
Nothing is captured until you allow it.
Open System Settings

Copied to clipboard
Capture region ⌘⇧4

This display has not been verified
You can still capture.
Don't show for this display

03 · MAIN WINDOW — CAPTURE CAPABILITY STATES

1 · Detecting capability

Lumiere
Capture region ⌘⇧4
Capture display ⌘⇧5
Output
Clipboard and folder
~/Pictures/Lumiere
Checking…
Settings

2 · Capture available

Lumiere
Capture region ⌘⇧4
Capture display ⌘⇧5
Output
Clipboard and folder
~/Pictures/Lumiere
Capture ready
Settings

2b · Pointer reveals the hint

Lumiere
Capture region ⌘⇧4
Capture display ⌘⇧5
Output
Clipboard and folder
~/Pictures/Lumiere
Drag to select an area
Settings

3 · Permission not granted

Lumiere
Screen recording permission is required
Nothing is captured until you allow it.
Open System Settings
Capture region ⌘⇧4
Capture display ⌘⇧5
Output
Clipboard and folder
~/Pictures/Lumiere
Capture disabled
Settings

4 · Native host unavailable

Lumiere
Native capture host is unavailable
Retry, or restart Lumiere if it doesn't come back.
Retry connection
Capture region ⌘⇧4
Capture display ⌘⇧5
Output
Clipboard and folder
~/Pictures/Lumiere
Capture disabled
Settings

5 · Capture in progress

Lumiere
Capturing region
Capture display ⌘⇧5
Output
Clipboard and folder
~/Pictures/Lumiere
Capturing… Esc cancels
Settings

6 · Last result was partial

Lumiere
Copied, but the file was not saved
The image is on the clipboard. The folder may be read-only.
Try saving again
Capture region ⌘⇧4
Capture display ⌘⇧5
Output
Clipboard and folder
~/Pictures/Lumiere
Last capture partial
Settings

04 · REGION OVERLAY — SELECTION AND CAPTURE STATES

1 · Waiting for selection

Drag to select · Esc cancels

2 · Dragging a selection

820 × 492
Release to capture · Esc cancels

3 · Valid selection

1232 × 740
Release to capture · Esc cancels

4 · Selection is too small

26 × 15 · too small
Keep dragging · Esc cancels

5 · Capturing

Capturing…

6 · Cancelled

7 · Capture failed

Capture failed — nothing was written
Esc to close · ⌘⇧4 to retry

8 · Focus or display layout lost

Display layout changed — selection reset
Drag to select an area · Esc cancels

05 · TRAY AND MENU BAR — PLATFORM MENUS

macOS menu bar

Capture region ⌘⇧4
Capture display ⌘⇧5
Open Lumiere
Settings…
Quit Lumiere

Windows tray

Capture region Ctrl+Shift+4
Capture display Ctrl+Shift+5
Open
Settings
Exit

06 · SETTINGS — OUTPUT, CAPTURE, SYSTEM AND ABOUT

Output

Output
Capture
System & About

Output
Default destination — Clipboard and folder
Save folder — ~/Pictures/Lumiere
File naming — Timestamped
Lumiere 2026-08-21 at 11.24.08.png

Capture

Output
Capture
System & About

Capture
Region shortcut ⌘⇧4
Display shortcut ⌘⇧5
After capture — Do nothing
HDR status reminder
Never blocks capture

System & About

Output
Capture
System & About

System & About
Screen recording permission — Granted
Native capture host — Connected
Version — 0.1.0
Native HDR-aware capture. Everyday output is sRGB Visual Match. Copied and saved mean delivered, not certified.

07 · PERMISSION AND CAPABILITY — EXPLAIN, GUIDE, RE-DETECT

Screen recording access is required
Nothing is captured until you allow it.
Request access

Access was denied
Capture stays off until the switch is turned on.
Open System Settings

Waiting in System Settings
Privacy & Security › Screen Recording, then return here.
Open System Settings

Permission not detected yet
If you just turned it on, Lumiere may need a restart.
Check again

Checking access…

Screen recording is allowed
Capture region

Access is still unavailable
Restart Lumiere after enabling the switch.
Open System Settings

08 · RESULT FEEDBACK AND HDR REMINDERS

Copied to clipboard

Saved to "Lumiere"
Lumiere 2026-08-21 at 11.24.08.png

Copied and saved to "Lumiere"
Lumiere 2026-08-21 at 11.24.08.png

Copied to clipboard, but the file was not saved
Try saving again

Saved the file, but could not copy it
Try copying again

Could not deliver the capture
Try again

Capture cancelled

HDR environment is not verified
Capture is unaffected. Output stays sRGB Visual Match.
Don't show for this display

Display layout changed since the last check
Capture is unaffected.
Check this display again

09 · WINDOWS — PLATFORM DELTAS ONLY

W1 · Capture available

Lumiere
Capture region Ctrl+Shift+4
Capture display Ctrl+Shift+5
Output
Clipboard and folder
C:\Users\You\Pictures\Lumiere
Capture ready
Settings

W2 · Graphics Capture unsupported

Lumiere
This version of Windows cannot capture
Screen capture needs Windows 10 version 1903 or newer.
Open Windows Update
Capture region Ctrl+Shift+4
Capture display Ctrl+Shift+5
Output
Clipboard and folder
C:\Users\You\Pictures\Lumiere
Capture unavailable
Settings

W3 · Settings, full-height sidebar

Settings
Output
Capture
System & About

Output
Default destination — Clipboard and folder
Save folder — ...\Pictures\Lumiere
File naming — Timestamped
Lumiere 2026-08-21 at 11.24.08.png

W4 · Display HDR is off

HDR is turned off for this display
Windows reports SDR. Capture is unaffected.
Open Display settings

W5 · What is not redrawn

Shared with macOS
Region overlay, tray menu, toasts and every settings row are identical apart from chrome, shortcut labels and paths.

Windows only
There is no screen-recording permission flow. Graphics Capture needs no consent, so the seven permission boards do not apply. Capability failures surface as W2.

Implementation
titleBarStyle hidden plus titleBarOverlay. The overlay region is system-drawn and the DOM cannot occupy it, so reserve 138 × 46 at the top right. Window corners come from the OS. Runtime font is Segoe UI Variable Text.
